About

My goal is to graduate with a B.Sc. in Computer Science. In order to achieve this, I am searching for a company with an interesting internship assignment that I can fully invest myself in. I am open to long and short term opportunities, both on-site and remote, anywhere in Europe.
I would describe myself as energetic, creative and a quick learner.

Education

15 – present	**HBO-ICT Software Development** HAN, Arnhem, The Netherlands Expected to graduate mid 2020
19	**Academic Minor** University of Warsaw, Poland
10 – 15	**General Secondary Education (O Levels)** KSG, Apeldoorn, The Netherlands

Language Skills

Dutch	Native
English	Fluent (CAE Certificate - Level C2)
German	Limited competency
French	Basic
Polish	Basic

Skills

Working Experience

06/18 – present
Print.com
Software Developer

Creating Vue.js front-end applications and TypeScript Serverless back-end micro services, with the goal of processing and supporting the ordering of printed products.

02/18 – 06/18
Dutch Tax Department
Intern Software Developer

Creating Java/JavaScript applications related to income tax. Analysing legacy applications to improve code quality, testability and security.

03/17 – 07/17
Irias Informatiemanagement
Part-time Software Developer

Creating applications with a Java back-end, AngularJS front-end and PostgreSQL database for visualising public transport data (e.g. route times and delays).

Interests

Besides Software Development and my personal side projects, I enjoy playing video games and have a passion for music. I also really like traveling and discovering new cultures and languages.
Physical activity is also important to me, in my free time I enjoy bouldering & snowboarding.
